Education

Bachelor of Technology in Computer Science And Engineering AI/ML

Jaipur, RJ

CGPA: 8.7

Aug. 2023 – June 2027

Experience

Research & Development Cell, Manipal University Jaipur

Jaipur, RJ

Research Contributor (AI/ML)

Jan. 2026 – Present

- Developing a climate-aware AI system by integrating data from **3 heterogeneous sources**, including satellite imagery, weather records, and soil datasets.
- Built scalable preprocessing pipelines for geospatial and time-series datasets containing **100K+ observations**, enabling efficient AI model training.
- Designed a modular machine learning workflow with **5+ automated preprocessing stages** for data cleaning, feature engineering, and dataset generation.

TechLearn Solutions Private Limited

Jaipur, RJ

Backend Development Intern

Mar. 2026 – May 2026

- Engineered **10+ RESTful API endpoints** using **Node.js**, **Express.js**, and **MongoDB**, supporting scalable backend workflows for a college-focused coding assessment platform.
- Designed optimized **MongoDB/Mongoose schemas** with **indexing**, **CRUD operations**, and **pagination** across **3+ core backend modules**.
- Developed **TRACE backend services** for **access control**, **college management**, **assessment workflows**, and **performance tracking**, following modular and scalable backend architecture.

Titan Private Limited

Lucknow, UP

Analytics And Insights Intern

June 2026 – July 2026

- Developed Python web scraping pipelines to extract and validate **2,000+ premium watch listings** across Amazon, Flipkart, and Myntra, covering **34 global and domestic brands**.
- Designed a competitor benchmarking framework spanning **40+ product parameters** across pricing, movement, assortment, and SKU insights for **6 premium competitor brands**.
- Automated extraction of **20+ product attributes** across **3 e-commerce platforms** and prepared structured datasets across **3 premium price segments** (Rs. 25K–Rs. 40K, Rs. 40K–Rs. 60K, Rs. 60K+) for business analysis.

Projects

API Sentinel | *FastAPI, PostgreSQL, SQLAlchemy, JWT, Docker* | [GitHub](#)

Jul. 2026 – Aug. 2026

- Built a secure API management platform featuring **JWT authentication**, endpoint monitoring, centralized request validation, and Dockerized deployment.
- Developed **10+ REST API endpoints** using **FastAPI**, **PostgreSQL**, and **SQLAlchemy**, following scalable service-oriented architecture.
- Implemented **RBAC**, automated API health monitoring, request logging, and secure authentication workflows for production-ready API management.

CraftMatch | *Flask, SQLAlchemy, Next.js, Tailwind CSS* | [GitHub](#)

Aug. 2025 – Sept. 2025

- Developed a full-stack platform connecting businesses with verified artisans, supporting **3 user roles** through intelligent matching and a responsive **Next.js** interface.
- Engineered **10+ RESTful API endpoints** using **Flask** and **SQLAlchemy**, implementing modular backend architecture, optimized database schemas, and secure validation.
- Built a recommendation engine utilizing **3 key matching factors**—preferences, location, and artisan performance—to deliver personalized recommendations.

RepoLens | *React, FastAPI, Gemini API, GitHub API* | [GitHub](#)

Jun. 2026 – Jul. 2026

- Developed an AI-powered repository analysis platform integrating the **GitHub API** and **Gemini API** to generate structured insights from repository metadata and source code.
- Built a scalable **FastAPI** backend capable of analyzing repositories across **5+ programming languages**, extracting project metadata and structure.
- Designed an interactive **React** interface providing AI-generated repository summaries, technology stack detection, and codebase explanations.

Technical Skills

Languages:	C++, Python, JavaScript, SQL
Backend:	REST APIs, Authentication, RBAC, Web Scraping, API Development
Databases:	PostgreSQL, MySQL, MongoDB, SQLAlchemy, Mongoose
Frameworks:	FastAPI, Flask, Node.js, Express.js, React.js, Next.js
Developer Tools:	Git, GitHub, Docker, Postman, VS Code
Core CS:	Data Structures & Algorithms, OOP, DBMS, REST APIs, 150+ LeetCode Problems
